

CS student at Penn State specializing in AI automation and technical sales engineering, with hands-on experience building enterprise-grade workflows on IBM's Maximo Application Suite using Python, REST APIs, and watsonx Orchestrate.

EMPLOYMENT:

IBM | AI Automation Technical Specialist | Co-Op

May 2025 - Present

Asset Lifecycle Management in Americas Top-Team

- Designed and developed reusable demo assets used in multiple client prospecting engagements, contributing to a \$100K sales opportunity progressing toward a pilot (Proof of Experience) phase.
- Developed Maximo Real Estate & Facilities enablement materials comparing Maximo Application Suite vs. TRIRIGA, enabling expansion opportunities and driving \$1M in sales across multiple opportunities.
- Built an AI-driven workflow automation solution that transformed a 30-minute multi-step inspection process into 3 chat-based prompts, saving ~25 minutes per inspection using Python, Maximo REST APIs, and watsonx Orchestrate.
- Reduced Maximo Manage demo readiness time by 40%, enabling faster demo delivery and allowing sellers to reuse demos across multiple client engagements.
- Created and maintained 8 reusable technical assets that improved team productivity and reduced redundant setup efforts across sellers and technical teams.
- Analyzed App Point usage data across Fortune 500 accounts to identify entitlement gaps and surface upsell opportunities, directly informing account expansion strategies.

Penn State University | CSE Grader | Part-Time

August 2024 - May 2025

CMPS131 (Intro to Python)

- Graded assignments with 99%+ accuracy for 1000+ students; providing detailed feedback that reduced regrade dispute turnaround time.
- Collaborated with a team of 8 graders and the course professor to ensure grading consistency, fairness, and alignment across all student submissions.

EDUCATION:

The Pennsylvania State University

University Park, PA

- **Bachelor of Science in Computer Science; Smeal College Business Fundamentals Certificate**

(Expected May 2027)

- **Honors:** Dean's List (Cumulative *GPA*: 3.57)

Relevant Coursework: Data Structures & Algorithms, Artificial Intelligence, Database Management Systems, Operating Systems, Systems Programming, Discrete Mathematics, Programming Language Concepts, Object Oriented Programming, Probability & Statistics, Finance

TECHNICAL SKILLS:

- **Languages:** Python, Java, C, C++, SQL, JavaScript (HTML/CSS)
- **Frameworks & Libraries:** Electron, NumPy, Pandas, PostgreSQL, React
- **Cloud & DevOps:** IBM Cloud, Docker, Kubernetes, Red Hat OpenShift, Linux, Git
- **Other:** watsonx Orchestrate SDK, REST APIs, SQLite, CI/CD

PROJECTS:

- **NittanyAuction:** Full-stack Flask/SQLite auction platform built with a team of 4; implemented bidder dashboard, product search, bidding with business rule enforcement, credit card management, payment flow, and seller rating system.
- **Personal Finance Tracker:** Built a full-stack personal finance desktop app using Electron, React, and SQLite, featuring transaction tracking, budget management, loan tracking, investment monitoring, and a local AI financial advisor powered by Ollama (llama3).
- **Personal Portfolio Website:** Built a personal portfolio site using HTML, CSS, and JavaScript to showcase projects and experience; features responsive mobile layout, tabbed content sections, and smooth scroll navigation.
- **Java Course Scheduler:** Built a SQL-backed GUI scheduling app in Java to manage course enrollments, improving scheduling accuracy and reinforcing backend–frontend integration.
- **MDADM Linear JBOD Implementation:** Developed a Linux-based C application simulating JBOD functionality with MDADM-like behavior, demonstrating low-level disk array management and data storage optimization.
