

An energetic and motivated Computer Science student who is seeking a summer internship to continue learning in the fast-paced world of technology while making a meaningful impact.

EDUCATION:

The Pennsylvania State University

University Park, PA

- **Bachelor of Science in Computer Science** (*Expected December 2026*)
- **Honors:** Dean's List (*GPA: 3.53*)
- **Relevant Coursework:** Data Structures & Algorithms, Object-Oriented Programming, Systems Programming, Programming Language Concepts, Discrete Mathematics, Digital Design

Cornwall-Lebanon School District

Lebanon, PA

- **High School Diploma** (*Graduated June 2023*)
- **Honors:** High Honors
- **RELEVANT COURSEWORK:** AP Computer Science: A, AP Computer Science: Principles.

TECHNICAL SKILLS:

Python • Java • C • SQL • HTML • CSS • JavaScript

EMPLOYMENT:

Penn State University | CSE Grader

August 2024- Present

- Grading assignments for CMPSC 131 in the Computer Science and Engineering department
- Collaborate with the professor and grading team to ensure accuracy and efficiency in evaluating student work
- Manage regrade requests by reviewing disputes and providing detailed feedback to students

1Mby1M | AI Intern

May 2024- August 2024

- Interned at One Million by One Million, a global virtual accelerator for tech startups
- Worked with a team of interns to review and refine educational courses offered by the company
- Engaged aspiring entrepreneurs on LinkedIn, promoting course content to help accelerate their startups

Sherwin Williams | Warehouse Technician

May 2024- August 2024

- Operated various warehouse equipment, including forklifts, industrial wrappers, and printers
- Consistently exceeded order fulfillment performance expectations by an average of 34%
- Strengthened data entry skills by efficiently managing inventory and processing orders using warehouse management systems

PROJECTS:

Java Course Scheduler: I developed a course scheduling application using Java and SQL, featuring a graphical user interface for managing course enrollments. The application integrates Java-based backend logic with SQL queries to interact with a database of courses, students, and semesters. This project enhanced my skills in object-oriented programming, database management, and user interface design.

MDADM Linear JBOD Implementation: I developed a C programming project implementing MDADM linear device functionality using JBOD (Just a Bunch of Disks). The project involved configuring disk arrays to operate as a single logical unit for data storage, showcasing my proficiency in systems programming and disk management concepts. This experience strengthened my skills in C programming, Linux systems, and data storage technologies.

Personal Portfolio Website: I designed and developed a personal website portfolio using HTML, CSS, and JavaScript to showcase my projects and skills. The site features a responsive layout, interactive elements, and a clean user experience. This project strengthened my front-end development skills and understanding of web technologies.
